

Multiple Ownership Exhibit

The proposed assignee will be acquiring three stations, 2 AMs and 1 FM, that have overlapping contours. A broadcaster is permitted by Section 73.3555(a) to own three stations in the same market as long as its ownership constitutes no more than 50% of the stations in the market.

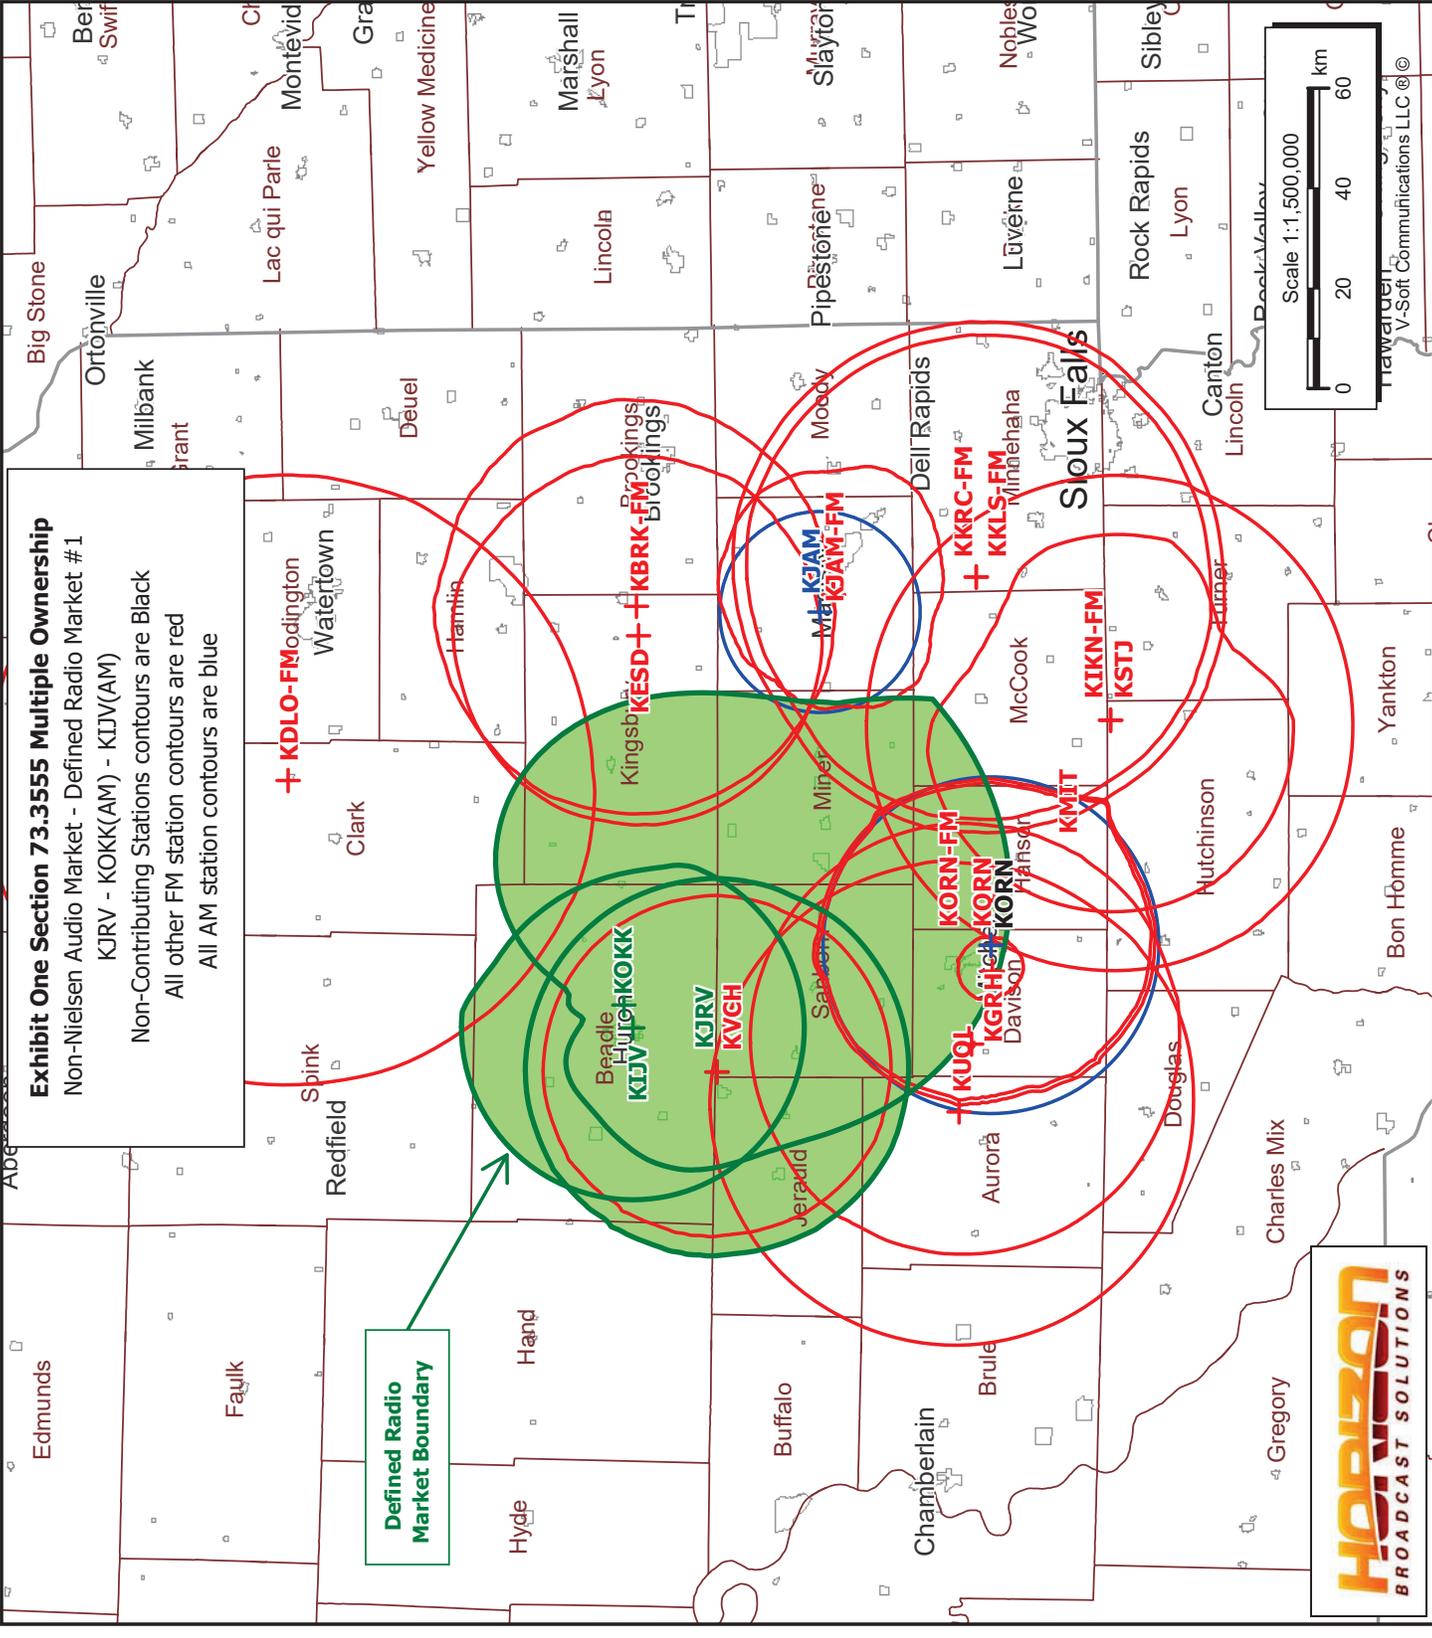

These stations are not in any rated market, and thus the market is defined by the contours of the overlapping stations. Attached is a map depicting the contours of the stations to be acquired by the assignee, and the other stations that have overlaps with the contours of the stations to be acquired. A tabulation of the overlapping stations is also attached, showing that there are at least 16 other stations with overlapping contours and are thus are considered to be in the same market. As the assignee will hold less than 50% of the licenses in the market, the acquisition of these three stations complies with Section 73.3555(a).

The map and tabulation were prepared by Donald Lynch of Horizon Broadcast Solutions LLC, 111 Sam Houston Drive, Kerrville, Texas.

KJRV
 Wessington Springs, SD
