

Reason for Reduced Power Notification

This is to notify the Commission, pursuant to Section 73,1560(d), that KZIA(FM), Cedar Rapids, Iowa, is operating at reduced power due to transmitter problems. These problems became significant on October 23, 2022, resulting in the station operating at approximately 32 kW ERP rather than the authorized 100 kW. A replacement tube for the transmitter which the licensee believes will resolve the problem has been ordered. The licensee will request an STA if the replacement part is not delivered and installed by November 22, 2022.
