

### **JUSTIFICATION FOR STA REQUEST - WUCW**

The instant request for STA is necessary to provide authorization for WUCW to broadcast temporarily using its new authorized antenna while operating with a reduced effective radiated power (ERP) of 580 kW in lieu of its authorized ERP 790 kW. WUCW's existing transmitter is not capable of generating sufficient output power to provide for the authorized ERP. Once the new transmitter is installed and tested WUCW will be able to broadcast according to its authorization. In order to provide sufficient time to perform these tasks the permittee requests the STA to be effective for six months.

Upon completion of the new transmitter installation and testing the permittee will submit an application for license to cover its construction permit, file number 0000185669.
