Re: Request for Extension of Special Temporary Authority

Call: WCKR-FM, Hornell, NY

FACID: 52842

To whom it may concern,

PMJ Communications Inc. the licensee of WCKR-FM, Hornell, NY respectfully requests extension of Special Temporary Authority granted on May 24th, 2022. Since the grant date the licensee has been attempting to move forward to resolve the original technical issues. The licensee reports that progress has been hindered by supply shortages and logistical difficulties. Specifically, the required replacement equipment was unavailable for four months due to lack of material and subsequent transportation delays. In addition it was discovered that the site access road was unsuitable for heavy vehicles.

As of this writing the equipment has been received and the site access road has been rendered usable. However due to the early onset of Winter weather in the region it is unlikely that the equipment will be installed until the Spring of 2023.

In consideration of the above, the licensee respectfully requests an additional 180 days to restore operation to licensed parameters.

Sincerely,

Richard C. Pogson

Technical Consultant
