

**Exhibit 1**  
**Public Inspection File**

The licensee regularly and timely posts required materials in the station's public inspection file, including political advertising documentation. Political orders received on a Friday are generally posted the next business day. In certain instances, the political advertising documentation was not posted "immediately," as interpreted by the FCC, but was typically posted within several business days.

The Class A eligibility certification required to be posted on Friday, April 10, 2020, was posted on Monday, April 13, 2020, due to logistical challenges resulting from work-at-home orders during the COVID-19 pandemic.

The licensee has emphasized to station personnel the importance of timely posting and has provided additional training to station personnel.
