I greatly enjoy channels 68. 1 through 68.5 here in Milwaukee County but it seems the channels keep going off the air almost every weekend and do not return until midweek. My question is what's going on?

David,

I live in west bend, I have an outside antenna that does not have low vhf elements. I cannot pick up channel 68 since it is broadcast on channel 5. Do you have any plans on moving to the uhf band? Also, will you be changing over to ATSC 3.0 in the near future?

Thank You,
Dennis Stenglein

Good Afternoon,

I'm a technician here at MSDF and we've been having quite a bit of trouble receiving your channel as of late. I need to know Where your tower is located so I can attune our antenna to fix this issue. I'm receiving constant complaints that no one can watch Quest, which it seems, is the most popular sub-channel you provide. My favorite as well.

Thank you

Joseph R. Theisen

Hi,

I live on the north side of the city of Racine in a second-story apartment facing north and use "dumb" rabbit-ears antenna for my digital TV. While I do very much enjoy the programming on your five channels 68.1 - 68.5, oftentimes my antenna doesn't pick up enough of a signal for a clear picture i.e., it's un-viewable/ completely scrambled, and there doesn't seem to be any rhyme or reason for when it occurs.

Do you have any suggestions?

Do I need to purchase an antenna w/ a pre-amp and its req'd A/C-input "wall-wart" power cord for more reliable reception?

Thanks! :-)

Hello David,

I live in Milwaukee and have a very hard time getting 68.2 reliably. I understand that your actual channel is VHF Channel 5? Is this located near or on one of the many the towers on Milwaukee's east side Estabrook Park/ Lincoln Park "antenna farm"?

I am going to have to create a custom antenna as my Terk TV50 just will not fit the bill

May I ask you the frequency that TV68 broadcasts on? Is it between 76 & 82 MHz

Is this signal vertically polarized ?

Thanks ,

Craig Nehring

We live in Jackson wi and have been able to get channel 68 We love it but can't get it now. We don't have access to cable so we bought a new mogul antenna supreme pro but it didn't help 65 mile range

Is there hope of getting 68 back? Thank you

Hello.

I recently heard that you had boosted your signal for the Milwaukee area. I am wondering if this process is complete? Because I still am having a hard time getting your signal Are there any plans to put a translator closer to this area? I like four of the five channels you offer but I just can't get them.

Thanks

Chris fisher

Good morning,

I'm a West Allis resident and a great fan of your over the air TV line-up. Generally speaking the reception is outstanding with my roof antenna.

Unfortunately, I'm experiencing daily reception problems, particularly just after 8:00 AM. I'm wondering if you are aware of this issue and if you have any suggestions?

Thank you,

Steven D. Stern

Hello,

My Name is Carl Engl,

I work for Bergmann Appliance and TV In Slinger WI. We install over the air antenna's. I have a client that lives in the Slinger/Hartford Wisconsin area whom is having reception issues with your station primarily. 68.7. I am using a Digitenna Non-Amplified deep fringe antenna, I added a ta-36 amplifier and it helped BUT IS Not consistent. My Meter says I have -2-3db at the antenna with a new three way splitter. I am a bit baffled.

If you can provide ANY Incite I'd greatly appreciate it.

I like to watch DABL and QUEST but I keep losing the picture on my TV. It is an old TV and I have it attached to one of those boxes which about 7 years ago or so we required to watch over the air programs. I live in a 6 unit Condo building in Waukesha, WI with a TV antenna on the roof of our building. What can I do to get the programs from going in and out (of range?). Diane
