

**Withdrawal of Application**  
**KBTC-DRT**  
**0000111588**

Bates Technical College requests withdrawal of its application 0000111588 for minor modification of the KBTC-TV digital replacement translator. This application was filed in April 2020 and has been objected to by Canadian authorities, despite passing an interference analysis using the Commission's *TVStudy* software.

Bates now intends to relocate the DRT antenna to an adjacent tower, at a lower power level which it believes likely to satisfy the Canadian authorities. In order to ensure that the new proposal is given a fresh look, we are requesting that the pending application be withdrawn so that the new proposal can be filed as a new application.
