

**STATEMENT OF JOHN E. HIDLE, P.E.
IN SUPPORT OF A PETITION TO AMEND
THE DIGITAL TELEVISION TABLE OF ALLOTMENTS
KCBY-TV - Coos Bay, Oregon
DTV - CH. 34 - 450 kW - 192 m HAAT**

Prepared for: SINCLAIR EUGENE LICENSEE, LLC

I am a Consulting Engineer, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission. I am a Licensed Professional Engineer in the Commonwealth of Virginia, No. 7418, and in New York State, No. 63418.

GENERAL

This office has been authorized by SINCLAIR EUGENE LICENSEE, LLC, licensee of KCBY-TV channel 11, licensed to Coos Bay, Oregon, to prepare this statement in support of a Petition to Amend the Digital Television (DTV) Post Repack Table of Allotments, §73.622(i) of the FCC Rules. The petitioner requests that §73.622(i) of the Commission's Rules be modified to change KCBY-TV's allotted channel. DTV channel 11 is currently specified in the Digital Television Table of Allotments for KCBY-TV. The petitioner requests herein to substitute DTV channel 34 for DTV channel 11. The proposed arrangement of allotments is made to enhance potential viewers' ability to more easily receive the broadcast signal of KCBY-TV.

Serious propagation problems associated with digital television broadcast (DTV) use of high-VHF television channels (7-13) remain unsolved. These are also well documented, both before and especially after the initial digital transition on June 12, 2009. These

PAGE 2**

propagation and reception problems for channels 7-13 have been severe enough for the FCC to have broken the ERP limit in Zone I where the ERP limit for channels 7-13 is 30 kW at 305 meters HAAT, and has granted a construction permit a for channel 7 facility with an ERP of 34 kW at 500 meters HAAT which met the FCC interference criteria. As a result this extraordinarily powerful authorized facility extends the distance to the noise-limited-contour by 19% and increases the predicted coverage area by 35.9% beyond the maximum distance and area permitted by the Rules in Zone I. And yet reception problems remain and continue to frustrate DTV broadcasters that use VHF channels, and a significant number of those station continue to struggle with propagation problems along with the subsequent viewer complaints. KCBY-TV now seeks to remedy this well known systemic problem in this instance by changing KCBY-TV's channel from VHF 11 to UHF 34, thereby providing its viewers with a significant improvement in reception capability.

EXPLANATION OF REASON FOR REQUEST

KCBY-TV's licensee has determined that the proposed migration from channel 11 to channel 34 will be a favorable arrangement of allotments based on the enhanced signal levels that will be delivered to a majority of the population within the station's "protected service area". The proposed change to channel 34 results in a predicted increase of more than 11,000 persons in the overall service area while retaining all but 392 existing predicted viewers of VHF channel 11. The licensee is convinced that changing KCBY-TV to operate on channel 34 will provide improved service to viewers and solve most, if not all of its current reception problems.

PAGE 3**

TECHNICAL STUDY

An engineering study of all pertinent allotments, assignments, applications, construction permits and DTV licenses reveals that DTV channel 34 can be allotted to Coos Bay, Oregon in lieu of channel 11, and meet all of the Commission's interference criteria. The allotment reference coordinates for DTV channel 34 at Coos Bay, Oregon are: 43 23' 25.4" N.L. and 124 07' 50.3" W.L.¹ The Coos Bay allotment reference site meets the allotment standards in §73.616(b); the requirements set forth in §73.616(f); the requirements set forth in §73.623(e), the requirement set forth in §73.623(f), and the principal community coverage requirements set forth in §73.625(a).

The petitioner proposes to install a new Dielectric model TFU-16DSB/VP-J-R SP directional antenna for channel 34 at KCBY-TV's current centerline height above mean sea level (AMSL) of 316.0 meters and 192 meters above average terrain. The proposed changes include the new directional antenna, an increase in ERP to 450 kW and a change from channel 11 to channel 34. The coverage area and population predicted to be served by KCBY-TV are significantly increased. All other station parameters are to remain unchanged.

¹ The channel 34 DTV allotment reference coordinates are the same as the DTV channel 11 allotment reference coordinates (as defined in Section 73.622(i) of the FCC Rules) of the petitioner's licensed KCBY-TV, Coos Bay, Oregon tower site. License BLCDT-20090612AGE (FCC tower registration is not required).

ALLOCATION CONSIDERATIONS

Post-Transition DTV Considerations

A study was performed, using the FCC's software, *tvstudy v2.2.5*, to determine if the instant petition to amend the post-transition Table is predicted to cause new prohibited interference to DTV stations, construction permits or DTV allotments. Results of the study indicate that the instant petition is predicted to cause no new interference greater than 0.5% to the populations served by any full-power DTV station, construction permit or allotment. See Appendix B. These results comply with the 0.5% limit for new post-repack interference set forth in §73.616(e) of the Commission's Rules.

International DTV Considerations

The KCBY-TV site is located more than 500 kilometers from the nearest point on the US-Canadian border and 1,200 kilometers from the nearest point on the US-Mexican border. Therefore no international coordination is required.

Class A Television Allocation Considerations

As required in Section 73.616(f) of the FCC's Rules, the study results in Appendix B shows no Class A station predicted to be affected by the re-allotment of KCBY-TV.

Land Mobile and FM radio Considerations

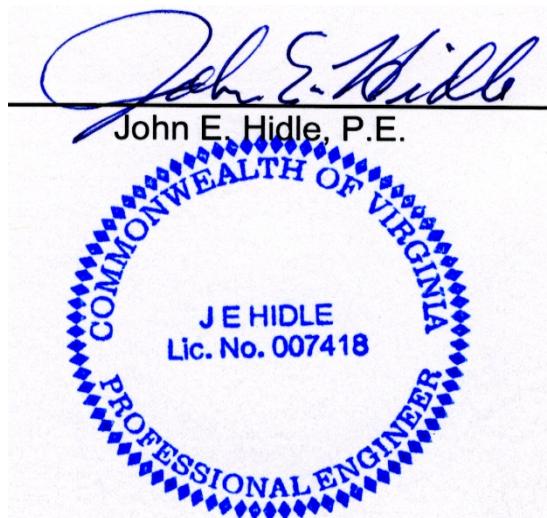

The *tvstudy* results found no Land Mobile violations for this site, and the site is deemed OK toward AM radio stations.

SUMMARY

It is submitted that the instant Petition to Amend the DTV Table of Allotments to substitute DTV channel 34 for DTV channel 11 in Coos Bay, Oregon, as described herein, complies with the Rules, Regulations and relevant Policies of the Federal Communications Commission. This statement was prepared by me, or under my direct supervision, and its contents are believed to be true and correct to the best of my knowledge and belief.

KCBY-TV - COOS BAY, OREGON JANUARY 2023 APPENDIX B Longley-Rice Interference Analysis

tvstudy v2.2.5 (4uoc83)
Database: localhost, Study: KCBY-TV 34 450 KW 192H DA #1949, Model: Longley-Rice
Start: 2023.01.05 11:26:02

Study created: 2023.01.05 11:26:01

Study build station data: LMS TV 2023-01-05

Proposal: KCBY-TV D34 DT APP COOS BAY, OR
File number: KCBY-TV 34 450 KW 192H DA
Facility ID: 49750
Station data: User record
Record ID: 604
Country: U.S.
Zone: II

Build options:

Protect pre-transition records not on baseline channel

Search options:

Non-U.S. records included

Baseline record excluded if station has CP

Stations potentially affected by proposal:

IX	Call	Chan	Svc	Status	City, State	File Number	Distance
No	KRCW-TV	D33	DT	LIC	SALEM, OR	BLANK0000107801	260.9 km

No non-directional AM stations found within 0.8 km

No directional AM stations found within 3.2 km

Record parameters as studied:

Channel: D34
Latitude: 43 23 25.40 N (NAD83)
Longitude: 124 7 50.30 W
Height AMSL: 316.0 m
HAAT: 192.0 m
Peak ERP: 450 kW
Antenna: KCBY Directional 160 degs rotation 0.0 deg
Elev Pattrn: Generic

40.7 dBu contour:

Azimuth	ERP	HAAT	Distance
0.0 deg	378 kW	169.6 m	75.6 km
45.0	312	69.8	63.3
90.0	157	99.1	64.5
135.0	303	108.8	69.0
180.0	379	231.7	80.3
225.0	63.8	252.1	72.5
270.0	72.7	301.2	77.1
315.0	58.8	266.7	73.1

Database HAAT does not agree with computed HAAT
Database HAAT: 192 m Computed HAAT: 187 m

**Appendix B - Interference Analysis
KCBY-TV - Coos Bay, Oregon
Channel 34 -450 kW - Page 2**

Distance to Canadian border: 539.2 km

Distance to Mexican border: 1333.9 km

Conditions at FCC monitoring station: Ferndale WA
Bearing: 10.5 degrees Distance: 630.3 km

Proposal is not within the West Virginia quiet zone area

Conditions at Table Mountain receiving zone:
Bearing: 96.5 degrees Distance: 1601.9 km

Study cell size: 2.00 km
Profile point spacing: 1.00 km

Maximum new IX to full-service and Class A: 0.50%
Maximum new IX to LPTV: 2.00%

Interference to proposal scenario 1
