

PURPOSE OF FURTHER AMENDMENT

The engineering data contained herein have been prepared on behalf of INTERNATIONAL COMMUNICATIONS NETWORK, INC. ("ICN"), licensee of digital Low Power Television Station KSDY-LD, Channel 31 in San Diego, California, in support of this further amendment to its pending Application for Construction Permit to specify operation with a new antenna pattern (LMS-0000176760). The government of Mexico objected to the original proposal due to predicted interference to translator XEWT-TDT, Channel 32 in Tecate, Baja California. The purpose of this amendment is to now propose a specific Alive ATC-BPEPSP antenna pattern for KSDY-LD that fully protects the Tecate translator. No change in the licensed KSDY-LD site location, effective radiated power or antenna height is proposed herein.
