

Multiple Ownership Exhibit

In addition to the instant transfer of control application, Licensee and the 2 Bits Family Trust ("Transferee") are filing concurrently three other applications seeking Commission approval of the 2012 transfers (the "2012 Transfers") of Rhonda and Joseph Hart's interests to Transferee (four in total). As detailed in the Agreement Exhibit attached to this application, as a result of the 2012 Transfers, Transferee has had since 2012, and will have following grant of the instant application, interests in two full-power FM radio stations and one full-power AM radio station.

None of the three stations is in a rated market. Accordingly, we used the interim contour overlap method to determine the relevant markets for these three stations. The contours of the three stations are shown in the below attached contour map.

Under section 73.3555(a)(2) of the FCC's rules, overlap between two stations in different services is permissible if neither of those two stations overlaps a third station in the same service.

As shown on the attached contour map, two of the stations in which Transferee has an interest, KGMN (FM) and KYET (AM), overlap but are in different services. Neither of these stations overlaps the third station. Accordingly, grant of the instant application will not contravene the Commission's multiple ownership rules.
