

Exhibit**Reasons for STA and Extension Request**

WVJP-FM, Caguas, PR (FCC Facility ID No. 6441)

The Commission is aware that on September 20, 2017, WVJP-FM, Caguas, Puerto Rico, lost part of its antenna and tower as a result of the destruction caused by Hurricane Maria. A silent STA request was filed with the FCC and authorized, and, after several months, the station restored service, but with reduced power pursuant to Commission special temporary authority in File No. BSTA-20171130ABN by using two bays of its licensed antenna and an auxiliary transmitter.

The most recent extension of that STA was granted on August 31, 2022, in File No. 0000198388.

The station is still involved in its reconstruction process and will need an extension of FCC authorization for use of its modified facilities in order to maintain minimum service to the public before full power operation can resume.

It is therefore respectfully requested that the Commission grant the station another extension of its current special temporary authorization for operation pursuant to the authority granted in original File No. BSTA-20171130ABN, subject to the terms and conditions specified in that original authorization.
