

## **REQUEST FOR SPECIAL TEMPORARY AUTHORITY**

Alejandro Luciano respectfully requests special temporary authority to operate Station W08EH-D, Ponce, Puerto Rico, at variance from its licensed parameters, with the facilities described herein. W08EH-D licensee, Alejandro Luciano, has arranged to operate at reduced power and height above ground from its licensed location while repairs to its primary antenna system are complete. In addition, the proposed STA contour is entirely within the authorized W08EH-D licensed contour as the included coverage map demonstrates.

A grant of the instant request will permit the station to continue over-the-air service to the public, which would serve the public interest. As such, Alejandro Luciano requests special temporary authority for six months to operate as provided in the instant STA Request.
