

Request for Special Temporary Authorization  
Radio Licensing Holding CBC, LLC  
Station WMOS(FM), Stonington, Connecticut

**WMOS(FM) Request for Special Temporary Authorization**

Radio Licensing Holding CBC, LLC ("RLH-CBC") respectfully requests a Special Temporary Authorization ("STA") to allow Station WMOS(FM), Stonington, Connecticut, to operate at reduced power, pursuant to Sections 73.1635 and 73.1680 of the Rules.

Station WMOS(FM) is licensed to operate with three kiloWatts of effective radiated power. As explained in its Reduced Power Notification, WMOS began experiencing problems with its transmitter, which could only operate at approximately fifty percent (50%) power. RLH-CBC engineers began trying to pin-point the problem immediately, which continues, and have reached out to the transmitter manufacturer to discuss the problem and obtain advice for repairs. Recent weather conditions in the northeast have delayed progress toward restoration of the transmitter, however RLH-CBC engineers are committed to resolving the problem as swiftly as possible.

In the meantime, RLH-CBC respectfully requests a STA to operate with reduced power of approximately 1.5 kiloWatts of effective radiated power until the transmitter is repaired and licensed operation is restored. Positive action on this Request will enable the Station to continue to serve the residents of Stonington, Connecticut.
