

Explanation for Extension of STA

Since the grant of the STA, the licensee has prepared and submitted an application with a tower owner to move to a tower adjacent to the licensed tower but, despite persistent efforts by the licensee, the landlord has not acted on the application. Until the landlord has provided reasonable assurance of the proposed use of the tower, licensee cannot file an application for modification of the W248DE facilities. As such, extension of this STA is sought to allow the licensee to continue to operate with the STA facilities and provide service to the b\public while it continues its efforts to obtain reasonable assurance for the new site and to file the modification application.
