

**ENGINEERING STA**

**WXSL-LD, St. Elmo, IL**

The instant Engineering STA is being filed for WXSL-LD, St. Elmo, IL (Ch 14) with reduced power to 1,200 watts ERP (TPO 106w).

This filing is being done in order to avoid interfering with SWECL - a local utility which uses Ch 14 for emergency workers (see attached letter).

SagamoreHill of Kansas City Licenses, LLC will be filing a mod for a channel change shortly.

**Re: WXSL-LD, St. Elmo, IL  
Facility ID No. 184764**

Dear Mr. Davidge:

As you are aware from past discussions, we have determined that WXSL-LD is causing interference with the Southwestern Electric Cooperative, Inc. ("SWECI") radio communications, which are used by SWECI employees in furtherance of SWECI's obligations to provide safe and reliable electric service to its customers. It appears that, in spite of your efforts, the interference is still present. Accordingly, we urgently request that you take all steps to modify your license so that the interference and associated public safety and service concerns can be obviated. Please send me a copy of any and all filings you make with the Federal Communications Commission.

Sincerely yours,

Bobby Williams, CEO  
Southwestern Electric Cooperative, Inc.
