Subject: 0000215280 - Profile Increment and Antenna Model

Good morning,

I began to review 0000215280 (W16CW-D) and found that the included TVStudy uses a 0.02 km profile increment. We believe this value is more detailed than the underlying terrain data supports, and we thus do not accept it. You must select a value in the range of 0.05 km up to 1 km.

Separately, I note the specified antenna's model number is "PSI UP SAMPLE 1". Is this a real antenna model number? If not, please specify a real antenna model number.

You have 30 days to amend your application and resolve the issues or the application will be dismissed.
