

DTV Auxiliary Construction Permit
UNIMAS CHICAGO LLC
WXFT-DT, Aurora, IL
Channel Sharing Guest (Sharee) of WLS-TV CH 22

WXFT-DT, Facility ID No. 60539, Aurora, Illinois (“WXFT”), channel shares with WLS-TV, Facility ID No. 73226, Chicago, Illinois (“WLS” and with WXFT, the “Sharing Partners”) pursuant to an agreement entered into in connection with the incentive auction. On December 12, 2019, the FCC issued WLS a license to operate an auxiliary facility at the John Hancock Center (“Hancock Aux Facility”).¹ The LMS records for WXFT, however, do not reflect the Hancock Aux Facility (notwithstanding that any operations from this facility would necessarily encompass WXFT as the guest of WLS). Accordingly, the instant application is being submitted for a construction permit for an auxiliary facility at the John Hancock Center for WXFT that matches that of WLS.² Upon grant of the instant application, WXFT will file a license to cover the channel 22 construction permit for an auxiliary facility at the John Hancock Center.

¹ See LMS File No. 0000093005.

² As currently configured, LMS does not allow the Applicant to edit the proposed channel of operation on the FCC Form 2100. As filed, the FCC Form 2100 incorrectly shows Channel 44 as the proposed channel of operation. Accordingly, the Applicant respectfully requests that the Video Division change the Channel and Facility Information – DTX Channel – from 44 to 22 on the accompanying FCC Form 2100.
