

**June 2023**  
**KPSA-FM Channel 253C2**  
**Mescal, Arizona**  
**Purpose of Amendment**

This amendment to the pending KPSA-FM application is being filed in order to make a slight change in the proposed antenna tower site. Where originally it was proposed to construct a new structure for KPSA-FM, it is now proposed to construct the station on an existing tower approximately 390 meters away from the originally-requested location.

This application remains as part of a contingent application group with a minor change application for New FM Channel 218A Lordsburg (FCC File No. 0000196732). There is no change to the Lordsburg 218A application.
