

ENVIRONMENTAL STATEMENT  
ACME TV Corp.  
July, 2023

The proposed site is an existing tower (ASR 1006963), and it is not proposed to alter the tower height.

From an environmental perspective, utilizing the Commission's documents from OET Bulletin 65, Supplement A, worksheets, and additional calculations, it has been determined that the proposal is compliant for RF exposure in both controlled and uncontrolled locations within any pertinent vicinity of the tower.

During installation, or at any other time requiring service, the power of other facilities on the tower will be reduced or operation ceased, as needed, per OET recommendations while workers are in the vicinity of the various transmitting antennas.
