

### Engineering STA Application Narrative

Applicant NRT Communications Group, LLC (“NRT”) is the licensee of digital TV station KVAW, Eagle Pass, TX (Facility ID 32621) (the “Station”). Concurrently with the filing of this request for STA, the Station is also filing a minor modification application (the “Minor Modification Application”) seeking authorization to operate the Station with a new PSI Slot antenna at 72 meters AGL and at 50 kW ERP. The Minor Modification Application parameters have been restated in this request for Special Temporary Authority.

The new antenna has been delivered and installed, and NRT now respectfully requests special temporary authority to operate KVAW according to the parameters specified in the Minor Modification Application, pending Commission action on that Application.
