

**KWGS(FM) REDUCED POWER NOTIFICATION**

KWGS(FM) is in the process of installing a new transmitter, and as a result the station has been operating at reduced power since July 19, 2023, with approximately 7,000 watts effective radiated power (ERP) instead of the licensed 50,000 watts ERP. To the extent necessary, a request for Special Temporary Authority will be filed if it is anticipated that reduced power operations will be necessary for 30 days or more.
