

AMENDMENT

This amendment is being submitted to correct the antenna pattern supplied in the technical detail attachment of the pending minor modification of construction permit application. Correct data was obtained for the Label Italy brand log periodic antenna and is attached to this amendment. The data sheet has been supplied in this amendment where the 360-point test data in watts for the vertical pattern was converted to a 36-point field pattern. This pattern was then rotated 235 degrees. The found 97.3 dBu interference area with second adjacent channel KLAX FM was then plotted at the proposed LPFM site using the directional antenna data mounted vertically, aligned at the azimuth 235 degrees from north. The resultant is zero overlap to public roads and residences (i.e., interference area affects zero population), meeting the requirements for a "Living Way" second-adjacent waiver request.
