

Exhibit to Request for Extension of Consummation

The parties request an additional 90-day extension of the consummation period. As previously disclosed in prior extension requests, the closing was delayed while station WMPA moved to a new tower because of the loss of the tower lease at the old site. At the new site the station resumed operations on 3/20/2023, but at reduced power due to technical problems (see Engineering STA authorization in LMS File No. 0000212589). Replacement equipment has been received and installed, and the station is currently undergoing testing to restore it to full authorized power – a condition to consummation of the sale.

All of the pertinent information included in the assignment application is still current.
