Request for Extension of Engineering STA

Venture Technologies Group, LLC (“Licensee”), licensee of LPTV station **KEFM-LD (Facility ID 127996), Sacramento, CA** (the “Station”), hereby requests an extension of its special temporary authority to operate an analog FM audio carrier as an ancillary or supplementary service within the Station’s assigned digital channel frequencies, File No. 0000210390, while the current rulemaking on this issue remains pending. The existing STA is scheduled to expire on August 20, 2023.

In its October 2014 *LPTV Third NPRM*, the Commission asked, among other things, “whether to allow LPTV stations on digital television channel 6 (82- 88 MHz) to operate analog FM radio-type services on an ancillary or supplementary basis pursuant to section 73.624(c) of the rules.”¹ Although the record developed in response to the NPRM overwhelmingly supported this approach, the agency took no action in its *Third Report and Order and Fourth Notice of Proposed Rulemaking*, declaring in a footnote: “We intend to issue a decision on whether to permit digital LPTV stations to operate analog FM radio type services on an ancillary or supplementary basis at a later date.”² The Commission refreshed the record in 2020 and subsequently issued a Notice of Proposed Rulemaking, but has yet to issue a decision.

The Licensee believes that under the FCC’s existing rules, it is permitted to offer an audio signal available at 87.7 FM on an ancillary or supplementary basis. *See* 47 C.F.R. § 73.624(c) (permitting DTV stations to use spectrum “to offer services of any nature, consistent with the public interest, convenience, and necessity, on an ancillary or supplementary basis” provided that such services “do not derogate DTV broadcast stations’ obligations” to offer at least one over-the-air video stream at no direct charge to viewers); 47 C.F.R. § 74.790(i) (incorporating Section 73.624(c) for digital LPTV stations).³ Nevertheless, out of an abundance of caution, it requests an extension of its special temporary authority to offer an analog FM audio stream on an ancillary or supplementary basis.

¹ *Amendment of Parts 73 and 74 of the Commission’s Rules to Establish Rules for Digital Low Power Television and Television Translator Stations; Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions; Amendment of Part 15 of the Commission’s Rules to Eliminate the Analog Tuner Requirement*, Third Notice of Proposed Rulemaking, 29 FCC Rcd. 12536 ¶ 47 (2014).

² *Amendment of Parts 73 and 74 of the Commission’s Rules to Establish Rules for Digital Low Power Television and Television Translator Stations; Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions; Amendment of Part 15 of the Commission’s Rules to Eliminate the Analog Tuner Requirement*, Third Report and Order and Fourth Notice of Proposed Rulemaking, 30 FCC Rcd. 14927 ¶ 4 n. 12 (2015).

³ Section 73.624(c) specifically authorizes the provision of ancillary or supplementary “aural messages” and “audio signals” on a broadcast, point-to-point, or point-to-multipoint basis. 47 C.F.R. § 73.624(c).

While operating pursuant to the special temporary authority requested herein, Licensee will continue to make efficient use of the ATSC 3.0 video portion of the Station's signal. To satisfy this commitment, the Station will provide at least one stream of synchronized video and audio programming on the ATSC 3.0 portion of the spectrum on a full time (24x7) basis that can be satisfactorily viewed on consumer receiving equipment based on the ATSC 3.0 standard. See 47 C.F.R. § 74.795(b); 47 C.F.R. § 73.790(g)(3).⁴ As permitted under the ATSC A/322 standard, the Station's ATSC 3.0 signal is configured to occupy 5.509 MHz of the Station's digital channel.⁴ The ancillary or supplementary audio signal occupies a portion of the remaining bandwidth assigned to the Station as part of its DTV channel. The audio signal does not derogate the Station's obligations under Section 74.790(g)(3) of the FCC's Rules, 47 C.F.R. § 74.790(g)(3).

The Station utilizes a complete transmitter system designed by Broadcast Engineering/Elenos and SYES with a single transmission line and the antenna system set forth in the Station's license. The Licensee provided notice to all potentially affected channel 5, channel 6, 87.7 FM, and 88.1 FM stations in its DMA that it was beginning digital service with ATSC 3.0 video and an ancillary audio signal. Since the Station began operating with this configuration, the Licensee has not received any complaints about interference from or on the Station. Should any unexpected interference occur, the Licensee will promptly take remedial action, including termination of all or part of the Station's signal, if necessary.

The Licensee commits that while it is operating pursuant to the instant STA, it will continue to make efficient use of the ATSC 3.0 video portion of the Station's signal. The Station will provide at least one stream of synchronized video and audio programming on the ATSC 3.0 portion of the spectrum on a full time (24x7) basis. The Station currently originates video programming provided by Jewelry TV. This video programming can be satisfactorily viewed on consumer receiving equipment based on the ATSC 3.0 standard. See 47 C.F.R. § 74.795(b); 47 C.F.R. § 73.790(g)(3).⁵

⁴ See 47 C.F.R. § 73.682(f) (permitting operations that comply with the standards set forth in ATSC A/322:2017); Advanced Television Systems Committee, *ATSC Standard: Physical Layer Protocol (A/322)* 69, Table 7.1 (June 6, 2017).

⁵ Although Section 74.795(b) references the DTV standard in Section 73.682(d), Section 73.682(f) permits the use of ATSC 3.0 "[a]s an alternative to broadcasting only an ATSC 1.0 signal," 47 C.F.R. § 73.682(f), and Section 74.782 permits LPTV stations to operate exclusively using the ATSC 3.0 standard, *id.* § 74.782(c).
