

## **Engineering STA Exhibit**

Educational Media Foundation (EMF) requests an extension of the special temporary authority to operate FM NCE station KLVW at reduced power. The station is operating at reduced power as a result of antenna failure. EMF is working to obtain the necessary equipment to replace the damaged equipment and schedule a tower crew for the site. As a result of the uncertainties in timing for the equipment and tower crew, there is not a date certain when the station will return to full power operations. A grant of this request is in the public interest as it permits EMF's listeners in the KLVW listening area to continue to receive EMF's unique programming.
