

## STA Request (Engineering)

KMVI (AM) Fac ID 9678

Kahului, HI, 5kW/5kW ND

In order to facilitate the relocation and adjustment of co-owned KNUI (AM) under the parameters of their construction permit (BP20220623AAC), Pacific Media Group respectfully requests permission to operate with parameters at variance while the new equipment is added to the combined transmission facility. It is not expected that this authority will need to extend for more than two months.

Once KNUI is added to the common antenna system and appropriate measurements are conducted, KNUI will establish new operating parameters and request a return to direct power measurement.

Respectfully,

A handwritten signature in dark ink, appearing to read "Bert Goldman", with a long horizontal flourish extending to the right.

Bert Goldman

Technical Consultant
