

## SPACING NARRATIVE

This narrative exhibit is submitted to demonstrate that this proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules. Attached as exhibits are a spacing study and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but one other FM facility. The attached maps demonstrate that there is no prohibited contour overlap between this facility and the instant proposed FM translator facilities. One full power station (grandfathered super power) and one FM translator have also been included to better show no prohibited overlap. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The three facilities that have been included on the attached maps are: WQKY, 98.9, Emporium, PA (60 dBu contour to proposed 54 dBu interference contour); W257AX, 99.3, Hornell, NY (60 dBu contour to proposed 54 dBu interference contour); and WDCX-FM, 99.5, Buffalo, NY (54 dBu contour to proposed 94 dBu interference contour).

A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
