

Compliance with Special Operating Conditions

The KLDX Construction Permit (File Number 0000215070) contains Two Special Operating Conditions:

- 1. The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.*
- 2. Permittee has specified use of the antenna listed in license BLED-19960125KG to demonstrate compliance with the FCC radiofrequency electromagnetic field exposure guidelines. If any other type or size of antenna is to be used with the facilities authorized herein, THE AUTOMATIC PROGRAM TEST PROVISIONS OF 47 C.F.R. SECTION 73.1620 WILL NOT APPLY. In this case, a FORMAL REQUEST FOR PROGRAM TEST AUTHORITY must be filed in conjunction with FCC Form 302-FM, application for license, BEFORE program tests will be authorized. The request must include a revised RF field showing to demonstrate continued compliance with the FCC guidelines.*

Educational Media Foundation ("EMF") complies with, or agrees to, the conditions as follows:

1. EMF in coordination with other users of the site agrees to reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna, from radiofrequency electromagnetic fields in excess of FCC guidelines.
2. In researching the transmit antenna specified in license BLED-19960125KG, it has been determined that the KLDX transmit antenna is not the same make and model as specified in license BLED-19960125KG. The Phelps Dodge CFM-HP-10 antenna was damaged and replaced with an ERI SHPX-10AC. No changes in the number of bays, center of radiation, or effective radiated power have occurred as a result of this transmit antenna change. An RF Radiation Compliance Study is included with this license application. Formal Test Authority has been requested in this license application.
