

**Request for Extension of Special Temporary Authority**  
**KVVN(AM), Santa Clara, California (FIN 28438)**

Pham Radio Communication LLC (“Pham”), licensee of KVVN(AM), Santa Clara, California (FIN 28438) (“KVVN”), respectfully requests a six-month extension of the Special Temporary Authority (“STA”) authorizing the station to operate with 25% of its licensed power and a non-directional pattern. *See* FCC File Nos. BESTA-20230320AAD (granted Apr. 20, 2023); BESTA-20220324AAB (granted Apr. 22, 2022, as extended Oct. 21, 2022); BESTA-20210916AAI (granted Oct. 26, 2021); BESTA-20210305AAI (granted Apr. 7, 2021); and BSTA-20200924AAF (granted Sept. 29, 2020). The current STA, as extended, is scheduled to expire on September 15, 2023.

Pham is nearing the completion of the modified facilities authorized for co-owned station KLIV(AM), San Jose, CA, FIN 19531 (“KLIV”), see File No. BP-20200511AAK. The underlying construction permit expires on September 15, 2023. Licensee continues to make significant progress in constructing the modified KLIV facilities, but will be unable to complete construction by the permit expiration date on September 15, 2023. Licensee is contemporaneously filing a replacement construction permit application for facilities identical to those set forth in the current construction permit, in order to have additional time to complete construction. Accordingly, licensee respectfully requests an extension of the existing engineering STA. No changes to the operating parameters of the engineering STA are proposed.

Once the modified facilities have been completed, KLIV will be co-located with KVVN, with a new daytime 6.2 kW ND pattern and a 5 kW nighttime DA pattern using the existing KVVN towers. KLIV is currently operating pursuant to an STA, File No. 20221222AAA (granted Jan. 20, 2023). Pham anticipates that the need for the KVVN and KLIV STAs will be eliminated once KLIV has filed a license to cover the modification application and begins operating with the KVVN towers.
