K202ED Mount Vernon, WA FAC #86755
8/31/23**

CSN International requests a waiver of Section 4.3 of the Canadian/US Treaty.

The 34 dB μ interfering contour of this proposal overlaps the Canadian border on the western border with the United States. However, the 34 dB μ overlap is entirely over water. The nearest Canadian land is Discovery Island, which is not touched by the 34 dB μ contour.

Even though the 34 dB μ interfering contour does exceed 60km, it does not include any part of Canadian Soil. Therefore, CSN International believes that a Section 4.3 waiver is warranted.
