

ENGINEERING NARRATIVE
WRVQ(FM) MINOR MOD TO LICENSE FOR MAIN SITE 200 kW ERP H&V
RC 137.3 M AGL RCA BFC-12B 94.5 MHz BLH-6152
RICHMOND, VIRGINIA
OCTOBER 12, 2022

Audacy License, LLC is seeking FAA approval to remove the steady burning side lights on the two towers utilized by WRVA(AM) BL-8810 and BZ-811022AJ. In the process of preparing the FAA filings it was discovered that the coordinates of the towers needed to be corrected. The WRVQ(FM) main and an auxiliary facility are located on the westerly tower. Detail for each tower is tabulated below:

Tower	FCC Reg. #	FAA study #	AM DA Tower
West	1041339	2022-AEA-14320-OE	#1
East	1041243	2022-AEA-14321-OE	#2

In anticipation of the FAA granting No Hazard Determinations in the near future minor mod license applications for the WRVQ(FM) main, and collocated auxiliary, are being filed at this time. Upon receipt of the FAA Determinations the licensee can proceed to update the ASR data for the two towers.

A minor mod license application to correct the array center coordinates for the WRVA(AM) license is also being filed.
