

### **Children's Television Programming Reports**

The Licensee submits this exhibit to provide additional information relevant to KFXO-CD's Children's Television Programming Reports filed during the license term.

The Licensee inadvertently omitted certain data from the Reports for Second Quarter 2016 through Third Quarter 2019. The Licensee provided detailed program data only for its primary program stream affiliated with the Fox network, and omitted detailed program data for its one multicast program stream affiliated with the Telemundo network.

KFXO-CD's Reports for this period in every case reported the average number of hours per week of core programming broadcast on each of its two program streams. The station aired an average of at least three (3) hours of core programming each week (averaged over a 6-month period) on the primary program stream and the multicast program stream for each of these quarters, as required.

The Licensee wishes to note that it filed two annual Reports for the year 2019. One Report submitted data for Third Quarter 2019 (LMS File No. 0000105631) and one Report submitted data for Fourth Quarter 2019 (LMS File No. 0000105638). The Licensee was not accustomed at the time to the new requirement to file a single annual Report, but it has become so and done so in subsequent years.
