

J Jireh Development Corporation Educational Purpose

As a community centered non-profit corporation J Jireh Development Corporation is focused on teaching their local community ways to improve life situations. We are a Christ based organization, so our first goal is to teach the precepts of a Christian life. We also believe that for many people food is an issue; especially good fruits and vegetables, so we also teach urban gardening and cooking for young mothers and families. Finally, we believe in jobs and financial stability for the community, so we also work to teach those types of skills to people in our community.

J Jireh Development Corporation plans to use this radio station as a conduit for teaching these types of life education events. We believe we can use the radio station facilities to teach job skills – not only in the radio industry, but in other fields that work within the office environment. We also hope to offer internships that will give money and experience to some of the inner-city residents who need the help.

It is our vision to make this a Christian music radio station during the work week, then put forth multiple helps/teaching talk shows during the weekend. Also, during the weekday shows, we will include what we will call Christian Nuggets. These nuggets will be five-minute Christian based hints on how to live a good Christ centered life. The weekend shows will include a financial repair show, a social justice show, and some family life improvement shows. We will work to train future disc jockeys in the music radio times and build the community with teaching talk shows during the weekends.

One other place this station will work in the community is with live remote radio. We plan to do live remotes at different church and non-profit organization events during summer months. We can bring our Christian music and do live interviews and live teaching moments that can also be put on the air.

J Jireh plans to produce most of their on-air content at their studios. The church programming will be recorded at various Central Ohio churches and the special programs may come from an outside source, but at least 95% of our programming will come from our in-house studios.

Education Goals (Proposed):

1. Teach Christian values and lifestyle (through music, nuggets, and talk shows)
2. Teach live survival skills like financial responsibility, gardening, cooking, home buying (through talk shows)
3. Teach job skills - radio and office (through internships and focused training classes)
4. Bring awareness to social needs and social justice issues (talk shows)
5. Support local community non-profits (with on-air live remotes, promoting classes, promoting special events)
