SS

Josh

We have completed the installation of WHOB TV Antenna.

The crew removed the old antenna and line. The new antenna and line were installed on the tower. The tower and tower compound was overgrown with vegetation. The crew spent significant time removing the vegetation.

The tower owner did not have the building ready for installation of the transmitter. There were issues with access and door damage. We expect the tower owner to have the building ready for installation shortly.

We appreciate the work.

R. Sterling Smith
Director of Tower Services
