EDUCATIONAL STATEMENT

New(LP)
Vienna, Maryland
Channel 225LP100 (92.9 MHz)

The Community Informatics Institute was founded in 2023 with the educational objective of training citizens in community informatics, the use of data, information, communication, and technology to enhance their communities.

The radio station will advance our educational program through the on-air teaching of the various concepts and techniques that we train in our classes. In addition, we will interview people who have employed community informatics methods for enhancing their communities, so that the listening public can better understand how community informatics can make a difference in the real world.

We will present topics that are especially of importance to residents of rural and disadvantaged communities, including homesteading, transitioning to solar, connecting with elected officials, challenging industrial permits, applying for grants, and conducting online research.

Sample Programming includes:

- Farming the Sun – How DIYers can harvest the sun for their energy needs in rural America.
- Muddy Paws Homestead – How one young couple is producing their own food on just half an acre of land.
- Meet Your Representatives – Opportunity to hear from and ask questions of elected officials.
- Build-a-Grant Workshop – How to pursue a grant opportunity
- Triumph over Technophobia – Overcoming fears of technology by demystifying topics like artificial intelligence, robots, privacy, hacking, etc.
- Lessons Learned – A program that dissects successes and failures of community action
