

PURPOSE OF APPLICATION

WWST Corporation, LLC

Wooster, OH

WQKT(FM) is presently licensed to operate on FM Channel 283B with a nondirectional effective radiated power of 52 kilowatts at 101 meters above average terrain. The attached application proposes to modify the WQKT license to correct the geographic coordinates and ground elevation to conform with the Antenna Structure Registration (**1036374**) for the existing tower that supports the WQKT antenna and is also used as the antenna for WKVX(AM). The filing of this construction permit application is necessary since the corrected coordinates differ from the previously licensed value by more than three seconds, precluding the use of a license modification application to accomplish this coordinate correction. This application proposes no changes in the actual WQKT operating facilities.
