

## EDUCATION STATEMENT

The Lumberton HAM Radio Club is an association of licensed amateur radio operators that has been meeting in Lumberton for approximately 5 years. Our purpose and goal is to educate the public, especially interested youth, about the value of HAM radio to the community in the event of an emergency.

Our informal association recently incorporated as a formal nonprofit corporation for the purpose of applying for a low power radio license. We intend to use this new station to further educate people about HAM radio, and to serve the community with coverage of local events, church services, and public service announcements.
