

Request for Extension of Special Temporary Authority
Station KCKN(AM), Roswell, New Mexico (Facility ID 57721)

Radio Vision Cristiana Subsidiary Corp. (“RVC”), licensee of KCKN(AM), Roswell, New Mexico (the “Station”), respectfully requests a six-month extension of Special Temporary Authority (“STA”) to continue reduced power daytime operations with the Station’s nighttime pattern.

The underlying STA was originally filed and granted in CDBS file number BSTA-20201103AAM. This STA was most recently extended in CDBS file number BESTA-20230616AAA and is currently due to expire on January 2, 2024.

The Station is still operating during daytime at reduced power – 30 kW – using the licensed nighttime pattern. RVC has been working diligently to return the Station to licensed operation. Since the most recent STA extension application was filed, repairs have progressed and are approximately 85% complete. RVC anticipates completing work around February 2024, but requests six additional months of STA as a buffer period for unexpected delays. A grant of extended STA will serve the public interest by allowing RVC to maintain the Station’s radio operation for its local community.
