

Statement of Public Safety and Educational Purpose

The city of Tocquerville intends to use the LP-FM station to broadcast emergency warnings such as those related to weather, traffic, communication, and transportation as well as health related warnings including water contamination and air pollution advisories. In addition to warnings, the city plans to broadcast public service announcements and announce local events open to the public. Live on- air discussions concerning elections, city council meetings, local education and public health concerns will be available for public participation.
