

## **Second Adjacent Channel Waiver Request**

Waiver respectfully requested pursuant to Section 73.807(e)(1) with respect to second adjacent stations WEDR (FM) and WKIS (FM).

At the proposed site, the  $f(50,50)$  estimated field strength for WEDR is calculated to 73.73 dBu, and for WKIS is calculated to 73.57 dBu. With an additional 40 dBu protection and rounded to the nearest decibel, both stations are protected to 114 dBu.

Applicant will install a multi-bay antenna array with reduced depression angles to eliminate interference. No population will be subject to interference from the proposed station.
