

WEGP – Compliance with Special Conditions

WEGP Construction is in compliance with all special conditions. The sole purpose of this construction permit was to reduce operating power. No changes were made to the physical or electrical parameters of the arrays other than power. Regarding the condition requiring a proof of performance based on field strength measurements or a moment method proof of performance, there is an existing MoM proof on file for this array under File Number BMML-20201013AEJ, which remains valid.
