Supplemental Appendix(s):

RF Appendix 1 - Radio Frequency Radiation Compliance Showing

EXPLANATION OF PROPOSAL: This LMS filing and accompanying technical report supports a Minor Modification of a Licensed Facility (Construction Permit Application) for FM Translator W225CS.L – Columbus, OH (Facility ID: 142648). A change in site locations, increase in antenna COR height and new directional antenna pattern are proposed. Continued operation on the present frequency of CH225D (92.9 MHz) with a directional power of 0.250 kW ERP circular polarization (H&V) is requested. The FM Translator will operate from a COR of 407.4 meters AMSL at the new site location. This filing specifies continued rebroadcast of Class B, AM Primary Station WWCD(AM) – Columbus, OH (1580 kHz); Facility ID No. 22341. The Translator will specify continued service to the community of Columbus, OH.

FACILITY COMPLIANCE SHOWINGS: The proposed Translator remains in compliance with 47 C.F.R. Section 74.1232 as noted herein. A map of the proposed 60 dB μ service contour in relation to the present 60 dB μ service contour has been included in **Exhibit 1**. The minor change proposed service area will overlap a portion of the presently licensed service area as noted in the exhibit. The proposed 60 dB μ contour of the Translator lies wholly inside the larger of the AM primary daytime 2.0 mV/m contour or a 25 mile radius around the AM site. The primary station service contour relationship has been plotted in **Exhibit 2**. Regarding permission to retransmit; both the Primary Station and Translator are under common control of ICS Communications, Inc.; therefore, permission to rebroadcast is implied.

The proposed facility will be located on the tower bearing Antenna Structure Registration Number 1020488. In support of this filing, a copy of the ASRN has been included in **Exhibit 3**. A depiction of the tower and antenna configuration has been included in **Exhibit 4**. Further notification to the FAA or ASR governing authorities is not required as this proposal will not increase the overall tower height.

The applicant would like to note use of the FCC 30 second terrain database for all allocation, contour and HAAT showings contained herein. A copy of the proposed HAAT calculation, demonstrating compliance with 47 C.F.R. Section 74.1235, has been included in **Exhibit 5**.

The applicant certifies compliance with 47 C.F.R. Section 74.1234 regarding access to the transmitter site, at all hours and in all seasons; and/or providing means to turn on and off, at will, the transmitting apparatus from a point which is readily accessible at all hours and in all seasons. In addition, the transmitter is equipped with suitable automatic circuits which will place it in a non-radiating condition in the absence of a signal on the input channel; with the transmitting apparatus adequately protected against tampering by unauthorized persons.

ALLOCATION COMPLIANCE SHOWINGS: The proposed Translator remains in compliance with 47 C.F.R. Section 74.1204 & 74.1205 toward all allocation protection concerns with the exception of WCOL-FM – Columbus, OH (CH222B) and WODC(FM) – Ashville, OH (CH227B). A general allocation study for this proposal is found in **Exhibit 6**. There are four (4) additional facilities, existing or proposed, close enough to merit further study. Therefore, a supplemental contour protection study has been provided toward each facility as included in **Exhibit(s) 7(a-d)**.

The applicant would like to note the existence of a 47 C.F.R. Section 74.1204(d) Second/Third Adjacent Channel Given Interference Waiver Request toward WCOL-FM – Columbus, OH (CH222B) and WODC(FM) – Ashville, OH (CH227B) as noted in **Exhibit 8**. Protection of the worst case calculated 131.8 dB μ F(50:10) Interference Contour, corresponding to the worst case calculated 91.8 dB μ F(50:50) Protected Contour, has been demonstrated through a downward radiation study. Full protection will be afforded all concerns as this area will not reach the ground nor a 158.7 meter artificial plane representing the highest unoccupied floor of the building mounted operation when taking into account the downward radiation characteristics of the antenna as supplied by the antenna manufacturer. A copy of the manufacturer's antenna specifications has been included in **Exhibit 9**.

Regarding protection of international concerns, the facility is and will remain within 320 km from the common border between the United States and Canada. However full protection will be afforded all Canadian concerns as noted in **Exhibit 6**.

ENVIRONMENTAL COMPLIANCE SHOWINGS: The proposed facility complies with the maximum permissible radiofrequency electromagnetic exposure limits for controlled and uncontrolled environments as set forth under §1.1310 and/or §1.1307(b)(3) of the Commission's rules and the RF radiation protection guidelines as set forth in OET Bulletin No. 65 (Edition 97-01), and the accompanying Supplement A, (Edition 97-01). Compliance has been demonstrated in the attached **RF Appendix 1** of this filing. The facility is, or will be, properly marked with signs. Entry is, or will be, restricted by means of fencing, locked doors or gates. In addition, coordination with other users of the site will be secured to reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.

Regarding compliance with the NEPA, Nationwide Programmatic Agreement and NHPA Section 106 for tower co-location, compliance with the Agreement is not required where no new tower construction is being proposed and the tower is not being substantially altered. Specifically, compliance is not necessary where only an antenna and feed-line are being added to an existing structure, as here. However, should the Commission determine compliance is necessary, upon notification to the applicant, the applicant will file FCC Form 621.

CERTIFICATION OF TECHNICAL CONSULTANT: *I declare, under penalty of perjury, that the contents of this report are true and accurate to the best of my knowledge and belief. I further certify I have over twenty-four years of experience as a broadcast technical consultant before the Federal Communications Commission ("the FCC"); and am familiar with the Code of Federal Regulations Title 47 ("the Rules") as pertaining to this report and its contents herein. The underlying data utilized in this report was taken directly from FCC databases or indirectly through third party software vendors securing data directly from FCC databases. This firm cannot be held liable for errors or omissions resulting from the underlying data. The information contained herein is believed accurate to the date reported below.*

Exhibit 8

47 C.F.R. Section 74.1204(d) Second / Third Adjacent Given Interference Waiver Request

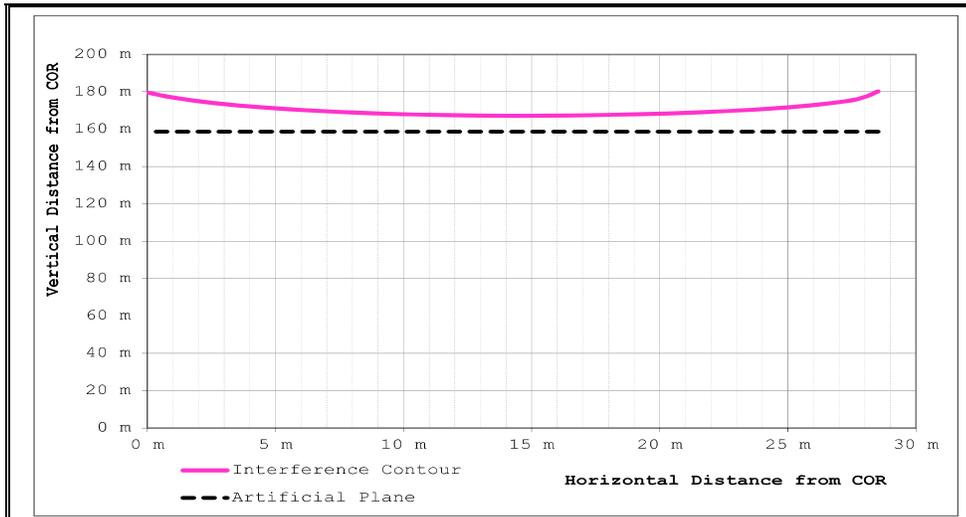

The applicant would like to note the existence of a 47 C.F.R. Section 74.1204(d) Second/Third Adjacent Channel Given Interference Waiver Request toward WCOL-FM – Columbus, OH (CH222B) and WODC(FM) – Ashville, OH (CH227B) as noted in **Exhibit 8**. Protection of the worst case calculated 131.8 dBμ F(50:10) Interference Contour, corresponding to the worst case calculated 91.8 dBμ F(50:50) Protected Contour, has been demonstrated through a downward radiation study. Full protection will be afforded all concerns as this area will not reach the ground nor a 158.7 meter artificial plane representing the highest unoccupied floor of the building mounted operation when taking into account the downward radiation characteristics of the antenna as supplied by the antenna manufacturer. A copy of the manufacturer's antenna specifications has been included in **Exhibit 9**.

Signal Report ✕

WCOL-FM Signal value at Reference site = 111.5 dBu. Distance to W225CS.P interference signal contour = 2.9 m

Signal Report ✕

WODC Signal value at Reference site = 91.8 dBu. Distance to W225CS.P interference signal contour = 28.4 m

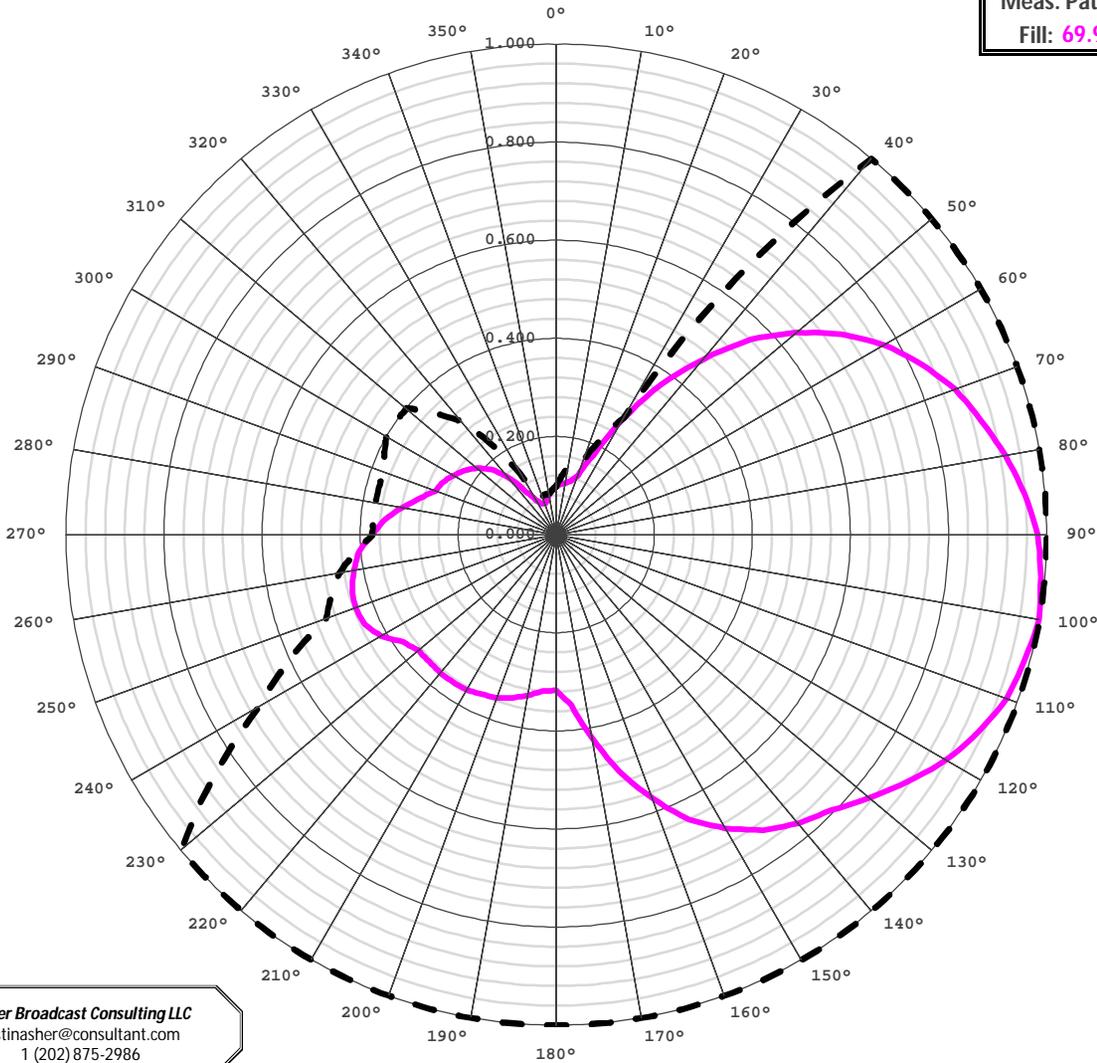

Proposed Antenna: Kathrein CA2-FM/CP-2DA (2-Bay Skewed)									
Proposed Power: 0.250 kW									
Antenna Height AGL: 180.3 meters									
Protection Plane Height: 158.7 meters									
Protected Contour: 91.8 dBμ F(50:50)									
Interference Contour: 131.8 dBμ F(50:10)									
				Field Strength (dBμ) Equation					
				$106.92 - (20 * (\text{LOG10}[\text{DistMeters}/1000])) + [\text{ERP} \text{ in dBk}]$

CA2-FM/CP

FM Yagi Antenna

88—108 MHz Circularly polarized

KATHREIN

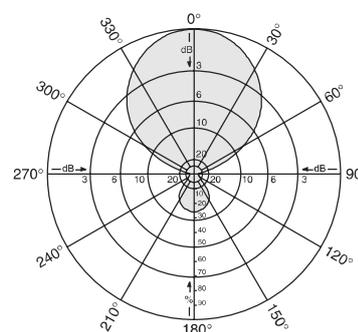

The KUSA CA2-FM/CP is a circularly polarized antenna, designed for professional FM transmit and receive applications.

Like all KUSA antennas, the CA2-FM/CP is made of the finest materials using state of the art electrical and mechanical designs resulting in superior performance and long service life.

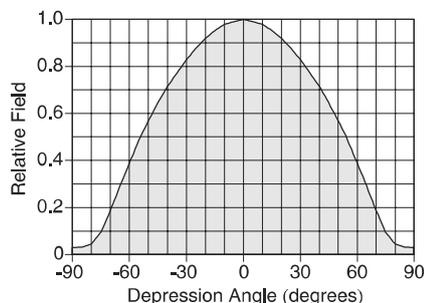

The CA2-FM/CP may be used stand alone or in stacked arrays for higher gain, increased side-lobe suppression, or custom azimuth patterns.

Specifications	
Frequency range	Any specified FM channel 88 to 108 MHz
Gain	1 dBd
Impedance	50 ohms
VSWR	<1.5:1
Polarization	Circular
Front-to-back ratio	>11 dB
Maximum input power	250 watts
Azimuth beamwidth	80 degrees (half-power)
Elevation beamwidth	80 degrees (half-power)
Connector	N female
Weight	21 lb (9.5 kg)
Dimensions	51 x 51 x 39 inches maximum (1295 x 1295 x 991 mm)
Wind load at 100 mph (161 kph)	
Front	34.6 lbf (154 N)
Wind survival rating*	120 mph (193 kph)
Shipping dimensions	75 x 11 x 6 inches (1905 x 279 x 152 mm)
Shipping weight	24 lb (10.9 kg)
Mounting	For masts of 2,375 inch (60 mm) OD.

Azimuth pattern

Elevation pattern

*Mechanical design is based on environmental conditions as stipulated in TIA-222-G-2 (December 2009) and/or ETS 300 019-1-4 which include the static mechanical load imposed on an antenna by wind at maximum velocity. See the Engineering Section of the catalog for further details.

Exhibit 9

Copy of Manufacturer's Directional Antenna Documentation (Actual Antenna Pattern rotated to 100.0°T & 210°T) (public record copy)

Exhibit 9
Copy of Manufacturer's Directional Antenna Documentation
(Actual Antenna Pattern rotated to 100.0°T & 210°T) (public record copy)

CA2-FM/CP
 98 MHz
 Maximum gain: 1 dBd
 Circular polarization
 Vertical plane pattern

CA2-FM/CP
FM Yagi Antenna
88—108 MHz Circularly polarized

KATHREIN
