

PROPOSED MINOR CHANGE TO CONSTRUCTION PERMIT
Translator Permit 0000233339
FACID 94111
W215BH Chattanooga TX

This minor amendment to the underlying Construction Permit is to correct the ERP value specified in the original application. All exhibits originally filed remain correct, and were calculated on the ERP value of 250 watts; inadvertently, the value in the application was only 80 watts and the Directional Pattern Data was omitted.

No other change has been made to the original application which was granted this permit.
