

RFR Statement of Compliance

The Applicant proposes to utilize a formerly licensed main facility for auxiliary purposes. No change in the physical location of the transmit antenna and no change in the authorized technical parameters are proposed herein. Therefore, the instant proposal will result in no change to the complaint RFR environment and would cause no change to the existing RFR safety plan at the multiple-use transmitter site. Further, the applicant remains committed to reducing power or ceasing operation as necessary to protect persons having access to the site, tower or antenna from RF electromagnetic fields in excess of FCC's occupational guidelines.
