

**RF Exposure Statement**  
**Construction Permit Application Auxiliary Facility Power Increase**  
**KTXH Houston, TX Channel 19**  
**July 25, 2023**

The facility proposed in this application will operate with an effective radiated power (ERP) of 1,000 kW and a center of radiation 532.2 meters above ground level (AGL). An analysis of the radiation levels at 2 meters AGL indicates that the RF exposure level would be well below the allowable limit for an uncontrolled area and therefore meets the requirements. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
