

### Station K43EE-D Minimum Operating Schedule

Scripps Broadcasting Holdings LLC (“Scripps”) acquired the license of translator station K34EE-D, Prescott-Cottonwood, Arizona (Facility ID 56142) on September 19, 2019, at which time K34EE-D rebroadcast the signal of full-power station KASW, Phoenix, Arizona, which was acquired by Scripps at the same time. During the transition of KASW to the ATSC 3.0 NextGen broadcasting standard, Scripps suspended operation of K34EE-D on July 1, 2020, as the translator would no longer be able to receive and retransmit the signal of KASW upon that station’s transition to ATSC 3.0. Due to inadvertent administrative oversight and station staff’s focus on completing the ATSC 3.0 transition of KASW, no STA to remain silent was filed for K34EE-D. Scripps did not discover the inadvertently missed STA filing until February 2021, at which point filing an accurate STA request in LMS was not possible. Scripps was ultimately able to modify the facility of K34EE-D to receive and retransmit the signal of commonly owned station KNXV-TV, Phoenix, and returned the station to operation using its full licensed facilities on June 12, 2021. K34EE-D is now on-air using those licensed facilities and rebroadcasting the programming of KNXV-TV and KASW, the latter of which is received via its ATSC 1.0 broadcast on a multicast channel of KNXV-TV.
