

STA Extension Request Exhibit

Ochoa Broadcasting Corporation (“Licensee”), licensee of WALO, Humacao, PR (Facility ID 50011) (the “Station”), requests an extension of its existing Engineering Special Temporary Authority (File No. 0000219288) (the “STA”) to operate with increased power of five kilowatts during nighttime hours. Despite diligent attempts to rectify the problem, Licensee continues to receive interference from co-channel station HICV, Barahona, Dominican Republic, and operating with increased nighttime power is necessary to negate the effects of this interference. Licensee has not received any complaints of interference regarding its nighttime operation but will reduce power if any are received. Accordingly, Licensee requests authority to operate under its existing STA for an additional six months.
