

Request for Special Temporary Authority

WLOV License LLC (“WLOV”), licensee of WLOV-TV, West Point, Mississippi (Facility ID No. 37732) (the “Station”), hereby requests Special Temporary Authority (“STA”) for the Station to continue operating from a temporary antenna, but at an increased power from its current STA. On February 2, 2024, the FCC granted the Station’s previous request for STA to operate from a temporary location with an ERP of 1.5 kW (LMS File No. 000073987). The Station has since secured a better transmitter that will allow it to increase power at the temporary site. The instant request, therefore, seeks authority to continue operating at the temporary location with an increased ERP of 3.13 kW.

As detailed in the previous STA request, WLOV’s agreement for the Station’s licensed transmission site terminated, but WLOV identified an alternative facility from which it can operate while it finalizes a longer-term facility for the Station and files for and obtains a construction permit for such facility. Grant of the instant STA request will allow the Station to continue providing service to its community of license.
