KXCI Auxiliary License to Cover File # 0235928

COMPLIANCE WITH SPECIAL OPERATING CONDITIONS

The KXCI Auxiliary facility is using the exact same antenna and equipment as licensed in 2014. Therefore is no change in the antenna and other certifications that were filed at that time. For convenience, those certifications are attached to this exhibit.

Since there has been no physical change to the equipment on the KXCI Auxiliary tower used by AM station KCEE, there is no change to any operating constants to the KCEE facility caused by the existing KXCI auxiliary antenna.

The only change in the operation of the KXCI auxiliary is the reduction in TPO from 8kW to 7.1kW, Therefore, any RFR conditions at ground level have not been increased. The 2014 RF report for the tower compound is attached to this application demonstrating that a fence complying with RF exposure limits has been installed. This fence continues to be in place.

The licensee acknowledges responsibility in coordination with other users of the site to reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.

CERTIFICATION

The undersigned hereby certifies that the foregoing statement and associated attachments were prepared by him or under his direct supervision, and that they are true and correct to the best of his knowledge and belief.
