

Engineering Statement of Certification

February 27, 2024

KWIZ-FM

Santa Ana, California

Construction Permit **BMLH-20090130AAH**

This letter is to certify that the KWIZ-FM directional antenna system was authorized by Construction Permit **BMLH-20090130AAH**. This letter certifies that the main antenna was lowered to the auxiliary position and a new one of identical make and model (SHP-2AE-DA-HW-SP) was put in its place of the main antenna location. Both antennas were reinstalled under my supervision by a qualified tower crew per the instructions provided by the antenna manufacturer ERI. A licensed surveyor was also retained to validate the orientation of the antenna and was correct per ERI documentation.

To the best of my knowledge both antennas are designed and installed in full compliance with the terms of the associated original FCC Construction Permit.

I have over 35 years of broadcast engineering experience serving as Chief Operator and Director of Engineering of multiple companies with expressed experience in AM, FM & TV RF systems including directional antenna systems.

References are available upon request.
